CIS336

Workshop 1 Exercise 2

Make a web page that looks like the following when it loads:

You will have to use <form>, <input> and <select> elements.

The start tag of your <form> element should have an attribute named **method** with the value "get" and an attribute named **action** with the value "http://www.brics.dk/ixwt/echo".

By making appropriate selections in your form and then pressing the submit button, generate a web page that looks like the following:

Results of form submission:

Name	Value
textBox	CIS336
radioButtons	Dog
checkBoxes	Air conditioning Leather upholstery Automatic transmission
dropdown	Red
multiple	Medium Large
submitButton	Submit

For help, see slide number 27 in Lecture 1 which is available here:
